2024 Economic Insights: Trends and Projections

The Federal Reserve (Fed) increased the target rate by 5.25% between March 2022 and July 2023 in response to prevalent inflation amid a tight labor market. The economic and market environment continues to be clouded with uncertainty as market participants grapple with questions regarding the Fed’s path forward and its potential impact on both the economy and interest rates. During this session, we will explore the current state of the economy, market considerations going forward, and the potential impact on the investment landscape.

When you complete this session, you should be able to:

- List two key drivers of economic growth.
- Recognize and identify at least three current factors impacting growth expectations.
- Name at least two indicators of capital markets’ reaction to these factors.

Thursday, October 24th, 2024 | 2:00PM
